

I am an over the road truck driver an i use my xm radio every minute im behind the wheel. I listen to the traffic and weather stations aprox 50 to 100 miles before i get into town and if there is a traffic or weather issue i can avoid it by rerouting myself or just stopping until the problem is cleared up. I pay for xm and i dont think the NAB has the right to tell me where i can and cant spend my money. It would be un American for you the FCC to stop this service that xm radio offers its customers. thank you for listening.
